

Imagine a World  
with Fewer Interruptions

### DI 425 Specifications

#### Sheet Feeders

Minimum Material Size  
127mm wide x 127mm long

Maximum Material Size  
229mm wide x 406mm long

Minimum Material Weight  
60g/m<sup>2</sup>

Maximum Material Weight  
120g/m<sup>2</sup>

#### Insert Feeders

Minimum Material Size  
127mm wide x 82mm long

Maximum Material Size  
230mm wide x 152mm long

Minimum Material Weight  
72g/m<sup>2</sup> (unfolded material)  
60g/m<sup>2</sup> (folded material)

Maximum Material Weight  
180g/m<sup>2</sup> (single sheet)

#### Envelope Feeders

Minimum Material Size  
220mm wide x 88mm deep

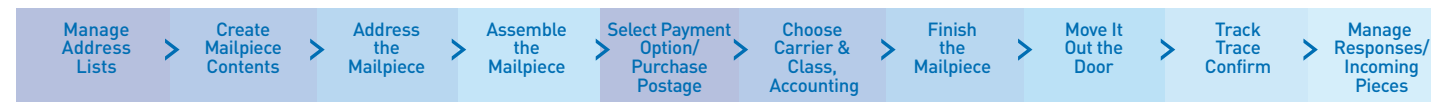

Maximum Material Size  
242mm wide x 164mm deep

Minimum Material Weight  
65g/m<sup>2</sup>

Maximum Material Weight  
100g/m<sup>2</sup>

### How effective is your mailstream?

*Pitney Bowes has the software, services, and hardware for end-to-end mailstream solutions that integrate and optimize the flow of mail, documents and packages across a range of business operations.*

## Business, Uninterrupted

OfficeRight™ Inserting System DI 380/  
FastPac™ Inserting System DI 425

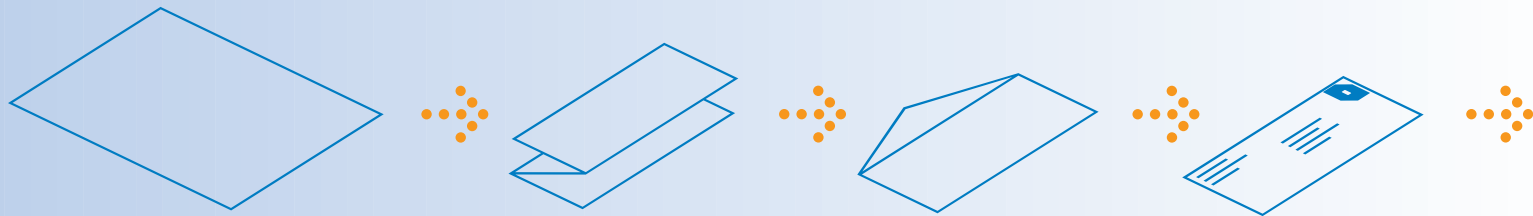

# When Your Mailstream is Moving, Your Business is Moving

There's a lot riding on your mailstream. Like your cash flow. The sooner bills go out, the faster you get paid. And revenue growth. Well-targeted direct mail generates new customers. Done right, your bills and statements become monthly opportunities for cross-sell and upsell.

Interruptions, however, can slow you down – and they can slow down your business.

That's why Pitney Bowes' technology exists. Our systems keep your business running smoothly by keeping your mail running smoothly.

With the DI 380/DI 425 Inserter Series, you get a seamless mailing process. Collating, folding and inserting are automated. Bills and statements go out promptly. You gain control and integrity with Optical Mark Recognition (OMR) so customers receive the correct marketing materials. When used with a DM™ digital mailing machine, inserting and mailing are integrated – this powerful combination brings benefits that flow through to the rest of your business. And then you have uninterrupted time to develop new business opportunities.

That's business, uninterrupted. That's Pitney Bowes.

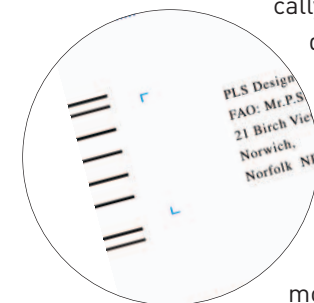

## Uninterrupted Flexibility

The DI 380/DI 425 Inserter Series can handle the needs of all kinds of organizations for automated mail assembly. Optional integration with a DM™ Mailing System allows for mail to be assembled, stamped and ready-to-go in a single process.

- **Medical services:** patient bills and statements, third party billing
- **Financial services:** confirmation notices, monthly statements, notice of payment due, coverage statements, explanations of benefits, direct mail programs
- **Real estate:** "latest listing" mailings, free valuation offers, brochures
- **Membership organizations:** newsletters, fundraising letters, donor thank-you letters
- **Professional services:** invoices, statements, announcements, newsletters

The DI 380/425 Inserter Series has the flexibility to handle multi-page statements and other variable-length mailings. You

can insert reply envelopes to speed up customer response, add promotional inserts to invoices or send out a newsletter to thousands of customers. The versatility of OMR marks and scanning capacity allow you to group sets of pages automatically.

## Uninterrupted Productivity

**Get More Mail Out, Faster, With Less Effort.** Think of the DI 380/DI 425 Series as the power tools of mail preparation. High-capacity feeders allow you to set things up

and go do something else while the machine is humming along. You can even reload on-the-fly, so when one sheet feeder empties, the system automatically switches to the other. And with the option to connect the inserter to your DM™ series mailing machine, you avoid having to move pieces between two systems.

These are durable, reliable, productive systems that keep your mailstream moving so your business can move ahead.

**Count on Reliable Operation.** When you have constant mailing demands, you will find this Inserter Series consistent and reliable. The easy-to-use user interface lets you load and run up to 20 pre-programmed jobs.\*

Each feeder handles 325 sheets per tray for increased productivity.

## Uninterrupted Accuracy

There's only one thing more important than getting your bills and statements out on time – getting them out correctly. Whether you are concerned about identity-theft laws, consumer-privacy concerns or HIPAA regulations protecting health-care data, you want to make certain that the right personal information goes into the right envelope.

The DI380/DI 425 inserters are intelligently linked with your DM™ series mailing system to ensure the integrity of your mailings and reduce processing errors:

- Get each piece delivered properly. Address correction assures that every piece gets mailed to where it is supposed to go.\*

On-screen icons and instructions allow you to produce error free work.

Balanced feeder capacities (sheet, insert and envelope) and output options let you achieve maximum throughput.

- Eliminate errors resulting from "mass mess." If one machine shuts down, so does the other, so there are no pile-ups and no painful manual restoration is required.
- Prevent feeding of multiple sheets with double-document detection.
- Avoid costly mistakes. OMR lets you scan and control what is inserted into each envelope.\*

## Uninterrupted Opportunity

**Increase revenue with sophisticated direct mailing campaigns.**

- Individualize your materials and messages with a level of segmentation that you can't achieve with manual and semi-manual mailing processes.
- Use these systems with PB First™ software and Optical Mark Recognition (OMR) to selectively include

promotional or informational inserts and create variable-page mail pieces.

**Maximize Return on Every Mailing:** Add promotional inserts with statements, invoices, order acknowledgments and other transactional communications.\*

**Get Time to Work On Your Business:** Take advantage of uninterrupted time to develop new ways of promoting your business, instead of worrying about production.

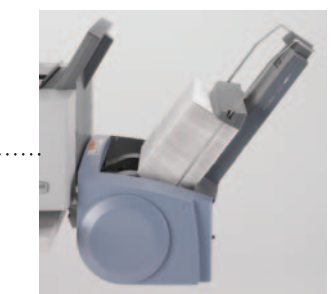

Caption to come. Caption to come. Caption to come. Caption to come.

## Inserting Technology that Moves You Ahead

**Keep crucial communications moving more quickly and smoothly than you've ever imagined possible, with the DI 380/425 Inserter Series.**

The Optional Optiflow power stacker lets you load and unload while the machine is running.

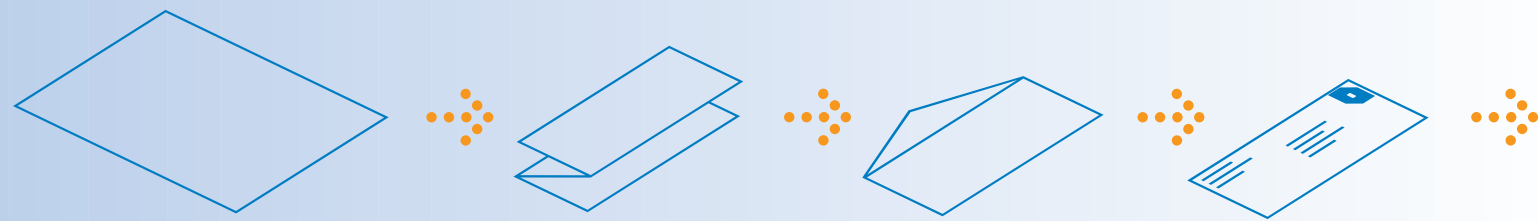

\*Requires PB First software.
